Lazer-Tech: Toronto, Ontario, Canada

Lazer-Tech Achieves Mil-PRF Certification

August 26, 2008

Toronto, Ontario Canada: Stephen Hazel Quality Assurance Manager at Lazer-Tech announced recently that the company has achieved its MIL-PRF 55110 certification for the United States Department of Defense.

“The designation of Mil-PRF-55110 certainly puts us on the map as a player in the MIL/Aero sector”, said Hazel. “We are also capable of processing PCBs with high layer counts; with 3 mil traces and spaces; not to mention blind and buried via holes up to 20 layers. Adding the Mil-PRF brings us into a new dimension of high tech PCB supplier.

Lazer-Tech has also completed the Controlled Goods Program (CGP) thus permitting possession or transfer of controlled goods in accordance with the Defense Production Act.

With the combination of MIL-PRF AND CGP Lazer-Tech is fully prepared to work with both US and Canadian companies in providing them with fully certified Mil spec Printed circuit boards.

About Lazer-Tech:

Based in Toronto, Lazer-Tech is one of the founding Printed Circuit Board manufacturers in the North America. Since 1968, Lazer-Tech has been a leading supplier of high quality printed circuit boards in both Canada and the United States, servicing their customers in the commercial, communication, computer, aviation, medical and military marketplaces. Their goal is to become “**Your Printed Circuit Board Solution**”. They strive to serve our customers by exceeding their valued expectations in all aspects of PCB manufacturing.
